

# The Impact of Glyphosate Use on Public Health

**Our country has no future if we continue to eat and drink the weedkiller Roundup. The active ingredient is glyphosate.**

**More than 80% of Americans have glyphosate in their urine due to pre-harvest spray of glyphosate on grains, legumes, sugarcane and more.**

## Glyphosate linked to:

### TO DO

- 1** Immediately ban the use of glyphosate and other synthetic chemicals for pre-harvest desiccation.
- 2** Ban the use of glyphosate in schools and all public places.

**Sick is the new normal for children. We know why.**

In 2011, 54% of American children were diagnosed with a chronic health condition.

## Children's Health Stats:

- 1:6** Asthma
- 1:5** Eczema
- 1:3** Food Intolerance
- 3:6** Seasonal allergies
- 1:22** Autism (in California)

### Clinical Perspective

*The toxic agriculture system has disenabled our future. Our future workers, our future military, our future teachers - because they will all have chronic disease. **This is a national epidemic of epic proportions.** This is the chronic poisoning of our children.*
